

MASTER DEGREE IN MICROBIOLOGY

MASTER IN MICROBIOLOGY DISSERTATION – Instituto Superior Técnico, Faculty of Sciences, Faculty of Medicine, Faculty of Veterinary Medicine

Objectives:

A scientific or more applied dissertation aims to promote the initiative, research autonomy and application of acquired knowledge, decision and organization of work by students. It is intended that students develop a dissertation integrating components of research or innovation. The theme could be developed in areas that students have experience, taking advantage of the knowledge and skills previously acquired.

Program:

The student dissertation subject will be chosen based on proposals by academic staff member of IST, FCUL, FMUL and FMV and accepted by the course coordinator.

Evaluation methodology

The students perform essentially autonomous work, which will be accompanied by the supervisor(s). The evaluation will take place in public discussion by an appointed jury according to the legislation.

Recommended bibliography:

Depends on the chosen theme.
